

PUCK

Cinema Caravana

Puck is a caravan turned into a projection room which has inside a minuscule cinema, maybe the smallest cinema in the world. It can only fit seven people at once.

Puck shows animation films; those kinds of films that we are not used to see on TV. It also selects films from every part of the world looking among the endless artistic content which has produced that genre for a long time. The menu is varied but select and it is especially dedicated to the spirit. The main aim of this project is to intensify the passion for animation cinema or just to recover the cinema experience, particularly, enjoying for a moment the smallest but so great audiovisual work.

Technical Requirements

We need: A flat area (about 240 yd²). Electricity 220V. Accessibility for the passing of a big van and a caravan to reach the acting area.

Assembly duration: 2 h

Show length: from 3 to 6 h

Dismantling duration: 1 h 30 min.

Shady area during the summer time. In the event that the show would be contracted for more than one day, the exhibition site will have night security services at disposal.
