

The strange travel of Mr. Tonet

Since the day we met Mr. Tonet's life in detail, we couldn't stop thinking about him and all the fantastic stories he had experienced. We met him by chance and for us it was such a discovery. Mr. Tonet was really a fascinating character and we want to share with you all his adventures. We have reconstructed some of his stories using disused objects, like wood, old furniture, and different items and tools found in the recycling plant. With all those materials we have built games to discover pieces of Mr. Tonet's travels. It deals about vivid stories turned to 10 games. Each game is inside a box, in each box there is a story, and in each story, with the robotics help, there is a character, a creature to discover. Entering inside the sound, light and movement world of Mr. Tonet will fascinate you. Hey! There is only one Mr. Tonet. He is unique! There's no one like him!!
